

# Issues with Education

## Money

Your passport and level of income is often indicative of the level of education you will receive. As a matter of fact, "Low-income countries have a 19% primary level out-of-school rate compared to only 2% in high-income countries."

## Misogyny

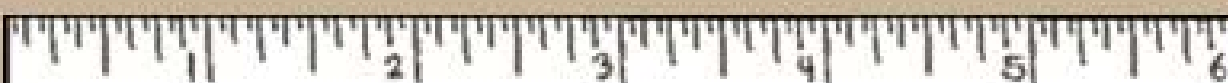

The relation between being a woman and being educated is staggering. In fact, "In low-income countries, 65% of girls between the age of 15 and 17 are not in school." While this has reduced with quality of life increasing, it's still rampant globally

"Education is the passport to the future, for tomorrow belongs to those who prepare for it today." – Malcolm X

## Opportunities

It's no lie that higher education leads to job opportunities. But the degree to which this is true is staggering. "College graduates see 57 percent more job opportunities than non-graduates, and it is estimated that, by 2020, two-thirds of all jobs will require postsecondary education." Nowadays it seems like being middle class almost requires a degree, and having such opportunities is an expensive privilege.

"Education is not the filling of a pail, but the lighting of a fire."
